Want to Learn More about the M.S. in Agricultural and Resource Economics?

The Department of Agricultural and Resource Economics offers a 1 year Master of Science program in applied economics. This program provides rigorous training in microeconomics, econometrics, and data analysis, as well as exposure to several applied fields including agricultural economics, finance, international development economics, and environmental and natural resource economics. It achieves this through a curriculum that is tailored exclusively for our M.S. students, a small program comprised of 20-30 students, and instruction from permanent faculty members. Graduates of our program have a long tradition of earning highly competitive jobs in the private and public sectors, and admissions to top PhD programs in economics or applied economics.

**Q&A Session:** To learn more about our Masters Program, we are hosting a virtual prospective student information session on Tuesday November 30 from 5:00 pm to 6:30 pm. Current graduate program members Rich Sexton and Steve Boucher will provide a program overview. We will also be available to answer any questions you may have. You can register for the event here: https://ucdavis.zoom.us/meeting/register/tJEvf-irrToiH9AYCnJ8jxXafFLNk4cwJ_t6
